

The orchestration engine for enterprise multimedia

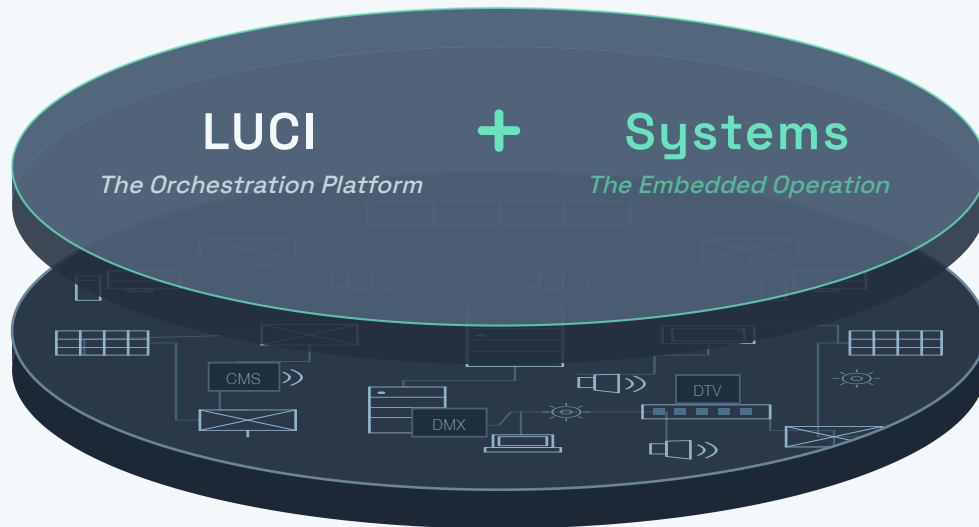

One interface to control, automate, and
execute the entire guest experience.

PREPARED FOR

AMERISTAR
CASINO • HOTEL
— COUNCIL BLUFFS —

LUCI Systems orchestrates every layer of technology

running your property — AV, signage, building, and operational infrastructure — from a single interface your team controls from anywhere.

LUCI is fueled by **two forces working as one.**

01

LUCI

THE ORCHESTRATION PLATFORM

The software that runs your entire AV environment from one interface.

02

Systems

THE EMBEDDED OPERATION

The engineers who deploy, operate, and refine it alongside your team.

Rather than adding layers to your stack, LUCI **reduces the variables, hardware, and interfaces** your team has to manage.

01

LUCI · THE ORCHESTRATION PLATFORM

Most properties run on a dozen disconnected tools,
each added by a different integrator, each with its own interface.

LUCI brings all of it under **one point of control**.

Complete visibility across your property

One interface surfaces every endpoint, zone, and screen — so every team acts from the same picture.

Align your teams by default

When everyone works from one platform, the property stops negotiating internally and starts executing.

Fully activate the guest experience

Passive screens become purposeful moments — planned, programmed, and responding in real time.

Invest in the only A/V that gets more valuable over time

Traditional A/V depreciates and expires. LUCI is refined on a predictable annual line item — so year five beats year one.

The LUCI interface — every endpoint, zone, and screen on one live floor plan.

KEY FEATURES

- ✓ Map-based dashboard
- ✓ Open API integration
- ✓ PIN-delegated control
- ✓ Predictive monitoring & alerts
- ✓ Mobile control
- ✓ Scalable by architecture

The team that fuels the platform. One accountable team of A/V engineers gets you live — then stays, operating and refining LUCI alongside your property for the life of the relationship.

“Well done, LUCI team! This was the best installation — so seamless.”

FACILITIES MANAGER · AMERISTAR COUNCIL BLUFFS

Every team that runs the floor works from LUCI – at the properties where downtime isn’t an option.

General management

One view of everything guests see and hear across the property.

Marketing

The right content in the right zone at the right moment – changed live.

Finance

One predictable annual line item instead of unplanned refresh cycles.

Casino operations

Direct guest attention and respond to any moment from a single screen.

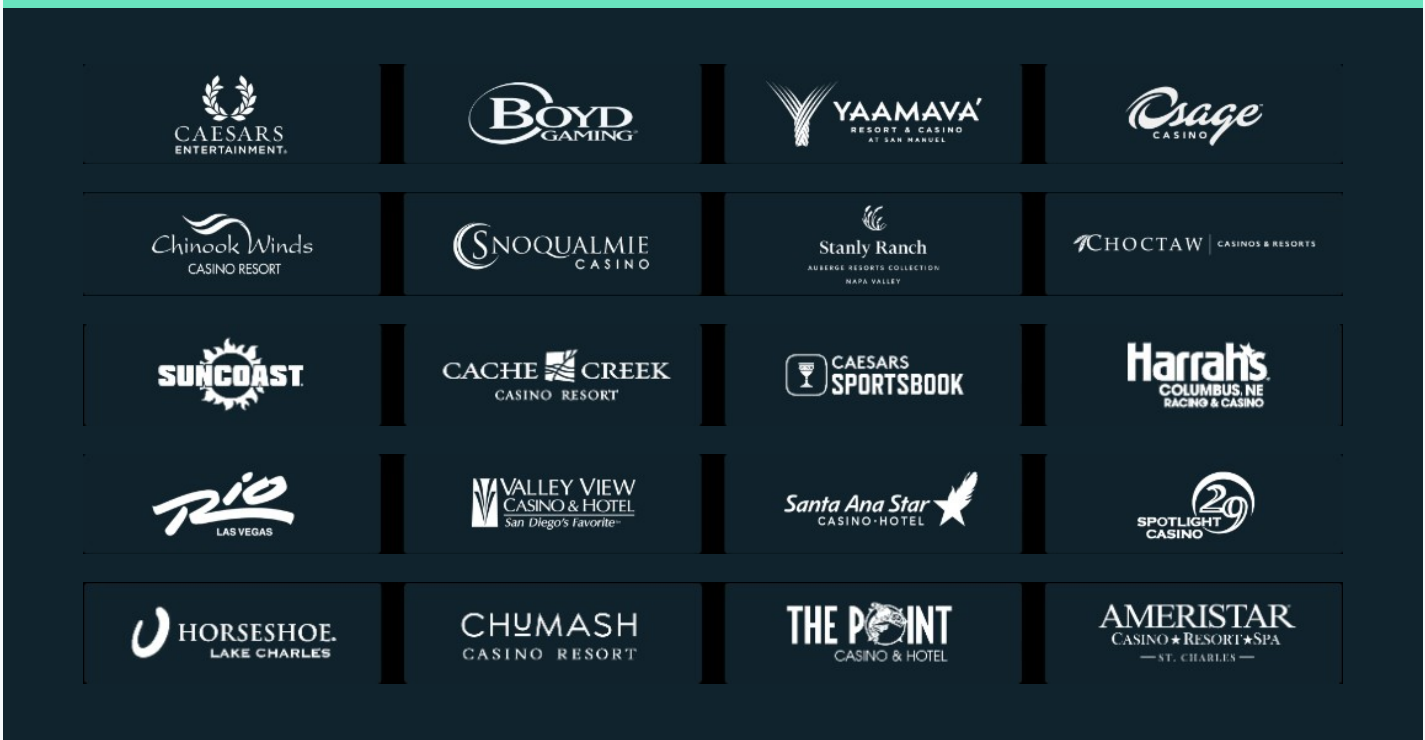

A/V

Operate every display, source, and zone from one interface.

IT

Every endpoint on the network you already run – no proprietary hardware.

TRUSTED AT PROPERTIES LIKE THESE

NEXT STEP

A property that gets simpler as it grows.

Schedule a scoping session to map your property's multimedia environment and define a deployment path.
