

LUCI

BUILDING A STRONG A/V FOUNDATION WITH

YAAMAVA'

Since 2018, LUCI has partnered with San Manuel to modernize and orchestrate the multimedia systems powering its casino operations and guest experiences.

Yaamava' Resort & Casino Highland, California · San Manuel Band of Mission Indians

YAAMAVA' RESORT & CASINO AT SAN MANUEL	**8 years** **Of partnership** Since 2018	**17-story** **Hotel expansion** Supported by LUCI	**10+** **Venues & locations** Across the San Manuel enterprise

The partnership from start to today

As San Manuel's resorts has expanded, LUCI has reinforced the partnership by providing the engineering, design, implementation, and ongoing support each phase required.

2018

LUCI foundation installed

Network-based multimedia integration across the property's existing systems.

2020

Infrastructure overhaul

Casino-wide audio system replacement during the COVID closure window.

2021-22

Major resort expansion

Casino, hotel, spa, pool deck, dining, retail, and meeting spaces.

2022

The 909 sports bar

Large-scale LED and multimedia expansion for a world-class sports bar and food hall.

2023-TODAY

Enterprise-wide support

Yaamava', Palms, corporate offices, and other facilities across the San Manuel enterprise.

A new foundation for a growing property

When LUCI partnered with San Manuel Casino in 2018, the property operated six separate audio systems and four video systems, each managed independently. This patchwork of equipment and controls made even routine operations unnecessarily complex, with no single way to manage the property as a whole.

LUCI's platform integrated the property's existing endpoints and systems, unifying them over the property's network under one control interface. Suddenly, what had been a collection of disconnected systems became a coordinated environment that was easier to manage and ready to grow. The project also helped drive LUCI's move away from restrictive proprietary control systems toward the open, software-based orchestration approach it uses today.

When COVID temporarily closed the casino in 2020, San Manuel and LUCI used the opportunity to overhaul its audio infrastructure. LUCI designed the new system, procured equipment, and coordinated installation partners—expanding its role in engineering and project management ahead of the property's major resort expansion.

1,000+

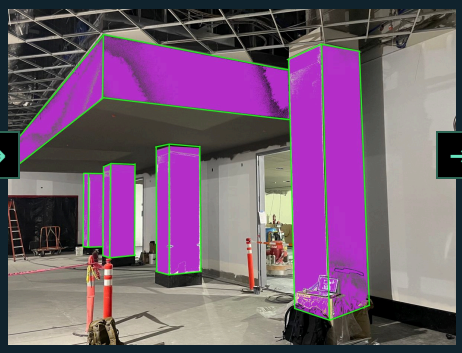

speakers replaced in eight months

New cabling, redesigned audio zones, and improved sound tuning and volume control throughout the casino.

Engineering alongside Yaamava's expansion

STRUCTURE

DESIGN

INSTALLED

As San Manuel advanced its major resort expansion, LUCI worked alongside the property's design and construction teams, architects, and other technical disciplines to ensure its A/V systems were engineered to work seamlessly from the start. The multi-year development added expanded gaming space, a 17-story hotel tower, spa, pool deck, restaurants, bars, retail, and meeting spaces, transforming San Manuel Casino into Yaamava' Resort & Casino.

LUCI contributed design, technical planning, construction coordination, and implementation throughout the project. The existing LUCI architecture scaled to accommodate new amplifiers, televisions, and control points without requiring separate audio, video, or control systems for each new space. The property continued to grow while maintaining a coordinated multimedia environment across the resort.

WHAT THE EXPANSION ADDED

- Expanded gaming space
- 17-story hotel tower
- Spa
- Pool deck
- Restaurants & bars
- Retail
- Meeting spaces

> **LUCI is the A/V backbone of the expanded resort.**

The 909 — every screen in the room on the same platform.

New venues. The same foundation.

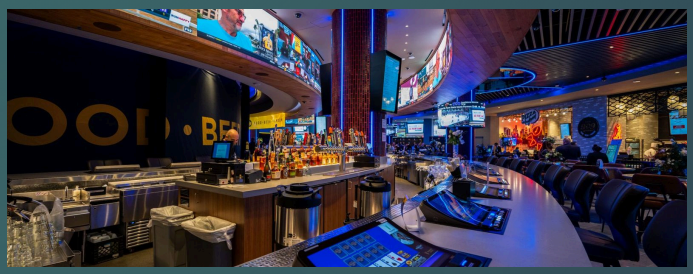

50′ × 12′
Game Day display

150+
Screens throughout the venue

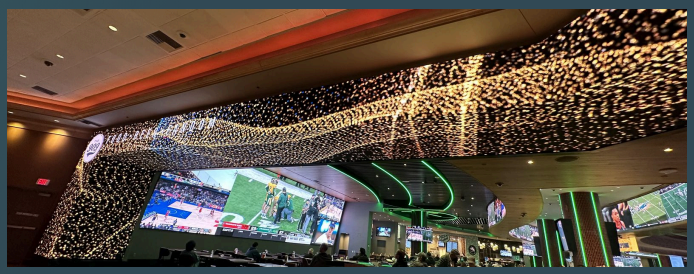

LED archway

The next major development brought LUCI's expertise to The 909, a world-class sports bar and food hall. Working with the architect of record and project teams, LUCI helped create an extensive LED environment featuring a 50-foot-wide Game Day display, an LED archway, and more than 150 screens throughout the venue.

Rather than introduce another standalone A/V system, LUCI expanded the backbone already in place at Yaamava'. The 909 joined the same multimedia management environment serving the rest of the property, extending centralized control to an entirely new guest experience.

The 909 bar and video ribbon

Ceiling LED over the sportsbook floor

34

LED walls across seven venues

Over the course of the partnership, LUCI designed and installed LED walls throughout the property, integrating each addition into the existing LUCI environment.

What eight years of partnership has built

Across these projects, LUCI worked as part of Yaamava's extended technology organization.

That continuity matters. The LUCI engineers supporting the next project already understand the systems in place, the decisions behind them, and the property's broader operational goals. They can move directly into each new phase of development, solve new technical challenges, and maintain the infrastructure already supporting its guests.

> *"What I love about LUCI's approach is that they really focus on how to make the operations easier for the business, and they do it in a really cost-effective manner. They look for ways to implement solutions that are easy to administer, have a reasonable cost point, and are easy to use."*

One LUCI platform

Every endpoint, every zone, every wall, every channel — one interface.

A foundation for the future

The relationship that began at San Manuel Casino now extends throughout the broader San Manuel enterprise. Each environment brings its own requirements, but LUCI applies the same approach everywhere: understand the operation, develop the right solution, coordinate the work, and remain accountable for the technology long after installation.

Through ongoing maintenance, system improvements, and planning for future projects, LUCI continues supporting the enterprise as its needs evolve.

WHERE LUCI SUPPORTS SAN MANUEL TODAY

- Yaamava' Resort & Casino
- Palms Casino Resort
- Corporate offices
- Conference rooms
- Firehouses
- Schools
- Banquet spaces

Your property's technology needs will change. Your technology partner should be prepared to meet them.

ABOUT LUCI

LUCI Systems is the orchestration engine for enterprise multimedia — A/V, signage, building, and operational infrastructure — from a single interface your team controls from anywhere. LUCI reduces the variables, hardware, and interfaces your team has to manage. When onsite experience and operational continuity are non-negotiable, LUCI delivers coordinated, real-time execution, end to end.
