

BUDGETARY ESTIMATE

PREPARED FOR YOUR PROPERTY

A scoped, line-itemed estimate following your LUCI Capabilities overview — built from demo and discovery, confirmed on site before a final quote.

CLIENT SUMMARY

[Property Name] is overhauling its multimedia system in a phased rollout. This estimate scopes Phase 1 — video and audio endpoints across the property — with a tier pricing sheet so leadership can see the investment for the full buildout.

PREPARED FOR

AMERISTAR
CASINO ★HOTEL
— COUNCIL BLUFFS —

An estimate for Phase 1.

A scoped, line-itemed estimate to stand up the LUCI platform at your property — the investment to go live, with a tier sheet for the full buildout.

Prepared for **[Property Name]** following our capabilities review and demo. This estimate scopes endpoint licensing, integration hardware, and professional services to bring **Phase 1** online. Figures are budgetary; scope is confirmed on site before a final quote.

WHAT LUCI IS

Two forces working as one.

KEY FEATURES

 Map-based dashboard Every display, audio zone, and endpoint on one live floor plan.	 Open integration Connects any A/V, signage, or building system via open APIs.	 PIN-delegated control Each user controls only their zones — permissions follow roles.
 Predictive monitoring & alerts Surfaces and resolves common issues before the guest notices.	 Presets & scheduling Save and schedule scenes so daily transitions run themselves.	 Automation & triggers Fire coordinated responses to jackpots, weather, and emergencies.

What this estimate covers.

The line items fund Phase 1 — 88 endpoints across video and audio, with the existing signage system carried forward and complex A/V reserved for a later phase.

Itemized by system — **video** and **audio** are in scope for Phase 1. **Signage, lighting,** and **complex A/V** are listed for context; they share the same platform and can be added in a later phase.

	Video Maximum Reach, Limited Hardware (COM3000, Encoders, LG STBs or Hospitality Grade TVs).	50 endpoints
	Digital Signage Only 1:1 players for menuboard, conference center, directional, and touch screens. The property keeps its existing Poppulo system for this phase.	EXISTING
	Audio Automate, customize, and schedule independent channels and stations for sound on property, with presets.	38 endpoints
	Lighting Ability to control the lighting system through the LUCI interface.	NOT INCLUDED
	Complex A/V Design and install of LED, video walls, and similar. Consultative services for future projects; nothing additional quoted here.	FUTURE

Final scope, endpoint counts, and hardware selections are confirmed during the on-site walk that precedes the final quote.

Professional Services					
LUCI	LUCI IDS	Integration Design Services — Drawings, Project Management,	1	\$35,000.00	\$35,000.00

Estimated investment.

Year-one total with the recurring platform cost, plus what the investment lets your team do across the property.

INVESTMENT SUMMARY

LUCI OS (Year 1)	\$35,112.00
Hardware	\$17,044.35
Professional Service	\$35,000.00
Estimated Shipping	\$375.00
Estimated Travel	\$4,200.00

Total\$91,731.35

CAPEX	OPERATIONAL RECURRING
\$91,731.35	\$35,112.00

WHAT THIS INVESTMENT DELIVERS

Run the floor from one screen
Every display and zone on one live map.

Change the property in one tap
Scenes shift the whole floor together.

Put the floor on a schedule
Signage, audio, and presets run without resets.

Catch problems before guests do
Monitoring flags issues early.

Give each team its lane
Role and PIN control keeps teams safe.

Build on what you already own
Open integration works with your gear.

Pricing that improves as you scale.

Per-endpoint pricing steps down as the full property comes onto the LUCI platform — so the more you consolidate, the lower your unit cost.

Per-endpoint price by total endpoint count

1 \$420.00	0%	100 \$399.00 YOUR TIER	5%	150 \$378.00	10%
200 \$365.40	13%	250 \$352.80	16%	300 \$340.20	19%
350 \$331.80	21%	400 \$319.20	24%	450 \$306.60	27%
500 \$294.00	30%	750 \$273.00	35%	1000 \$252.00	40%

Priced at the 100-endpoint tier. Final tier is set by total endpoint count at final quote.

NEXT STEP

A property that gets simpler as it grows.

Review this estimate with leadership. When we're aligned, we'll schedule an onsite to validate scope and issue the final quote.
